Boost your business by accepting electronic payments

When it comes to receiving payments, there is nothing easier than doing it electronically.

Aside from the obvious advantages over traditional payment methods such as cash or check - time savings, expense control, reduced risk of loss and theft, and lower commissions - you can also save money by reducing your workload through process automation.

Thanks to these benefits there's little wonder that electronic payments methods are rapidly growing in popularity, and companies that offer them put themselves at a competitive advantage.

However, some organizations are still reluctant to adopt these methods of transaction due to the technical difficulties that this entails. The support of different credit card brands, platform integration, high availability and data protection are just a few factors to bear in mind, not to mention the complications of PCI DSS compliance*.

With B1 iPayment you don't need to worry about any of these things. It connects your company directly to a payment gateway, where transactions can take place simply and securely.

By using a tokenization system, **B1 iPayment** eliminates the risks of storing sensitive data. All credit card details are stored by your payment gateway, which is completely PCI DSS compliant, and a token, or representation of those details, is passed down to SAP Business One.

B1 iPayment also has a positive impact on the efficiency and productivity of your operations. By using automatic workflows and tasks to redesign the way you work, you can leave your old-fashioned, manual procedures behind.

B1 iPayment is the easy way to get started with electronic payments, and thereby improve your customer relationships and optimize your company's financial processes in SAP Business One.

* PCI DSS compliance refers to the industry guidelines for protection of payment card details and personal data.

Key benefits and features

COMPETITIVE ADVANTAGE FOR YOUR BUSINESS

SAVE (A LOT) OF MONEY

Processing electronic payments enables companies to save huge amounts of money. Every aspect of non-electronic payments requires time and investment: posting, deposits, employees, manual processes, security, anti-fraud procedures, insurance, thefts... while electronic payments only involve relatively small transaction fees.

MAXIMIZE SPEED AND SECURITY

Electronic payments eliminate security risks, inconvenience, and the costs involved in handling cash and paper checks.

IMPROVE CUSTOMER RETENTION

A customer is more likely to make a repeat purchase from suppliers that already have their information stored. Similarly, your customers don't have to spend time queuing or on the phone waiting for their turn to transact - you can accept their payments 24/7 and at their convenience.

GET PAID QUICKLY

Automating payment processes will help you to get paid more promptly and efficiently, so minimizing issues that could turn into settlement delays. After all, healthy cash flow helps your business grow!

FREEDOM OF CHOICE

B1 iPayment supports multiple payment gateways. This gives you the freedom to choose a suitable payment provider based on your preferences, location, support agreements, data processing levels, customer service and transaction fees.

ABSOLUTE PAYMENT SECURITY

PCI DSS COMPLIANT GATEWAYS

B1 iPayment is integrated with the best known and most trusted payment service providers, all of which follow the strictest security standards.

NO PERSONAL INFO

In accordance with GDPR guidelines, you can choose not to store or clear any personal identifiable information on credit card holders.

TOKENIZATION

B1 iPayment does not store, process or transmit card details or cardholder data - only a representative token is used, keeping your business free of sensitive data.

ADD CREDIT CARD LINKS

Send your customers a secure link so they can enter their card details directly into a safe payment service provider website form. No one in your company needs to handle sensitive data!

FRAUD PREVENTION DATA-CHECKING

Take advantage of an extra layer of security provided by featured gateways, including additional verification systems such as AVS/CCV2/CAVV.

STREAMLINE YOUR FINANCIAL PROCESSES

AUTOMATE NOW!

Simply create your documents in SAP Business One and let B1 iPayment do the work for you. Authorizations and settlements can be made automatically, from Sales Orders, through Invoices and all the way up to Accounts Receivable!

B1 PRINT & DELIVERY INTEGRATION

Maximize your productivity by combining B1 iPayment and B1 Print & Delivery! Send automated emails to your customers, containing personalized messages and PDF attachments featuring embedded links for making an online payment. An entirely effortless process, from invoicing to cash in the bank.

PAY NOW LINKS

Get paid immediately by sending your customers a direct link to a payment page associated with a specific document.

BATCH TRANSACTIONS

Save time by batch processing credit cards transactions – e.g. authorizations, settlements and refunds.

NO MORE OVERDUE PAYMENTS

Keep credit cards up to date by using the Credit Card Expiration Report. Check which credit cards are about to expire and update them before the next billing period.

MASS LINK GENERATOR

Keep organized! Export a CSV file list containing Business Partners, emails and Add Credit Card links to easily submit to your contacts and get their credit card information in place.

SUPPORT MULTIPLE CARDS

Handle different scenarios assigning multiple cards to customers and payments.

ONE-TIME CUSTOMERS

Easily handle one-time customers, assigning credit cards and their transactions to independent documents.

POINT-OF-SALE

B1 iPayment supports Square - a prominent payment service provider offering a POS solution for SAP Business One. In this way, you can extend your electronic card payments to the physical point of sale.

EASE OF USE

GO-LIVE CHECKLIST

For quick and easy configuration of B1 iPayment, just follow the checklist steps to set up your preferred payment gateway.

TROUBLESHOOTING ASSISTANT

If something goes wrong, you'll be guided through a detailed action log, featuring a list of solutions and actions to take.

BEYOND SAP BUSINESS ONE

Extend your reach by integrating B1 iPayment with third party systems such as e-commerce stores, and benefit from a unified flow of operations.

"WE WANTED TO OFFER ELECTRONIC PAYMENTS, BUT SECURITY WAS A MAJOR CONCERN."

"Then we found B1 iPayment and it's a great solution. First off, it does not store any sensitive data. Also, it has reduced our workload as many financial processes are now fully automated in SAP Business One."

John Silva, Finance Manager, Quali-T Consumer Service

Industry leading solution provider

Boyum IT Solutions is today the global leading software solution provider in the SAP Business One ecosystem and have received more than 20 SAP awards. Among these are the SAP Global Solution of the Year Award and People's Choice Award, which we received for the last 4 years.

We have the largest partner and customer ecosystems, with a presence in 115 countries and just over 9,000 customers and 200,000 users.
