Simplifying connected operations in SAP Business One with B1 InterCompany

Managing transactions across multiple legal entities shouldn't slow your business down. B1 InterCompany by Boyum IT transforms how your company collaborates across subsidiaries and parent entities using SAP Business One. By connecting data, documents, and workflows between systems, you streamline operations, reduce errors, and create a more connected business environment.

Bringing your companies together

Instead of juggling emails, spreadsheets, and double-entry tasks, B1 InterCompany ensures smooth communication between systems. From sales and purchasing to inventory and master data, every touchpoint becomes more efficient, more consistent, and easier to manage. No more bottlenecks - just clear, automated transaction flows that support your growth.

What B1 InterCompany does:

- Synchronizes master data across entities (items, partners, equipment, BOMs)
- Automates key document flows such as sales, purchases, invoices, and credits
- Supports dropship and warehouse transfers with or without stock
- Tracks change and maintain transparency across all transactions
- Adapts to multi-currency and multi-lingual environments

"B1 InterCompany has been a significant relief for our employees. It simplifies our international sales process and ensures stable, reliable operations across sister companies."

Claus Roed, Director,

Core benefits at a glance

1 Simplify daily transactions

2 Maintain data consistency

3 Reduce operational risk

4 Harmonize document flows

5 Centralize control

Core benefits at a glance

1. Simplify daily transactions

- Reduce friction in procurement and fulfillment between business units
- Automate repetitive document exchanges to save time and reduce errors

2. Maintain data consistency

- Keep inventory, partners, pricing, and user-defined fields aligned across companies
- Avoid discrepancies and improve reporting accuracy

3. Reduce operational risk

- Monitor transactions in real-time with full audit trails
- Enhance control with segregation of duties and standardized flows

4. Harmonize document flows

- Automate trade documents like POs, receipts, invoices, and credit memos
- Improve internal coordination between sales and purchasing processes

5. Centralize control

- Streamline master data management from a central point
- Make better decisions with real-time visibility into intercompany activity

Streamline Your Finances with B1 InterCompany

The Ultimate Financial Consolidation Solution for SAP Business One

Simplify your financial consolidation processes by automatically consolidating financial data across multiple entity subsidiaries. The solution eliminates the need for manual reconciliation and spreadsheets by synchronizing the chart of accounts and journal entries - replace manual work with accurate, automated reporting.

- Harness real-time data and SAP Business One's standard reporting for deeper financial insights, ensuring informed decision-making.
- Equip your leaders with the clarity they need to drive strategic growth and long-term success.

Solution features overview:

Master data synchronization

- Items, business partners, equipment cards
- BOMs and user-defined fields

Data mapping capabilities

- Price lists, partner and item groups
- Payment methods, terms, and additional expenses

Built for flexibility

- Multi-language and multi-currency support
- Compatible with both SAP B1 HANA and SQL versions
- Designed for businesses operating across multiple subsidiaries or regions

Predefined transaction flows

- Drop-ship with/without stock
- Warehouse transfers, invoice-to-invoice, credit memos
- A/P and A/R reserve invoices
- Intercompany service and support scenarios
